<p>Catch Basins (12, 18, & 24 in.) remove standing water from landscapes</p> <p>Flat & Atrium Drain Grates</p> <p>Channel Drains & Grates for hardscapes</p> <p>Channel Drain Radius Couplings for drainage around curved edges</p>	<p>Flo-Well® Dry Wells manage stormwater runoff close to its source</p> <p>EZFlow™ Gravel-free French Drains help prevent surface flooding</p> <p>StormChamber™ Systems provide high-volume detention with a small footprint</p>	<p>EZ Roll® Gravel Pavers for cart paths and cart barn areas</p> <p>EZ Roll® Grass Pavers for pathways, emergency fire lane, and overflow parking area</p>	<p>Standard and Pro-Spec® Series valve boxes for irrigation system components</p> <p>Jumbo Boxes work for larger systems such as sprinkler valves</p>	<p>Drain pipe fittings connect pipes together</p> <p>Check valves help prevent backflow in pipelines</p> <p>Swing joint assemblies make irrigation installations easier</p> <p>Expansion repair couplings make pipe repairs easy</p>	<p>Root barriers direct root growth downwards to help prevent costly property damage</p> <p>Dripline delivers water along the entire line</p> <p>Drip tubing and emitters can provide precise watering to individual plants</p>

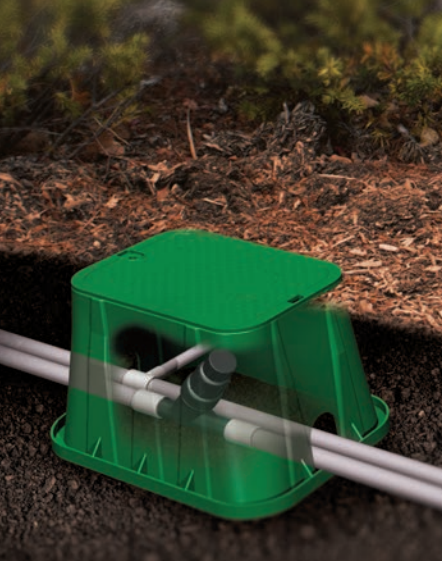

Drainage

Remove water where it doesn't need to be. Prevent costly damage with drainage solutions to capture and convey stormwater for proper release downstream or to slowly infiltrate into the ground.

Permeable Pavers

Engineered for high compressive strength, our reinforced turf and gravel systems offer an alternative to traditional paving. Runoff is reduced by absorbing into the ground, recharging groundwater, and slowing down erosion.

Valve Boxes

Protect irrigation system components and keep them out of sight. Durable enclosures in various sizes provide clean and secure environments for valves, control zone kits, sprinkler systems, and other fixtures.

Pipe Connections

We offer a wide range of engineered pipe connections — from drainage fittings to connect drain pipe and components together, to specialty fittings to set up a new irrigation system, expand an existing system, or make repairs.

Landscape

Root barrier products direct root growth from shrubs and trees downward, preventing costly property damage to pavements, roads, walls, or building foundations.

Irrigation

Drip irrigation waters plants efficiently, reducing water usage by up to 70% compared to conventional sprinkler irrigation. Systems are easy to install, operate, and maintain.
