

Trump Taj Mahal Casino Resort

Project Information

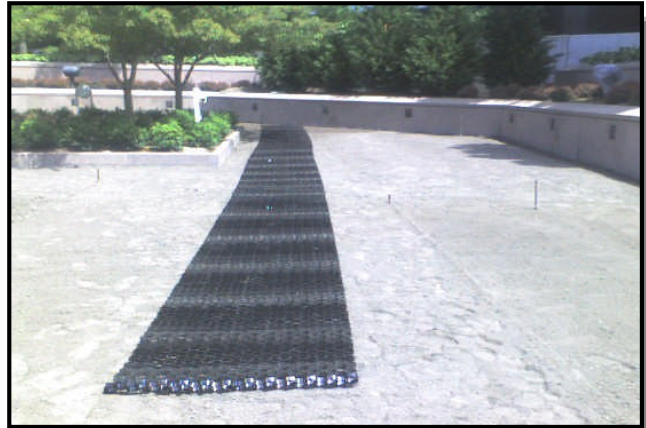

The Building and Grounds Department for Trump Entertainment Resorts, Inc. needed access to the facade of the Trump Taj Mahal in order to provide maintenance to the building and allow emergency vehicles the ability to drive on the lawn area. EZ Roll provided the perfect solution for this project due to its strength and flexibility.

Herman Coucci from Coucci Landscape Contractors was very impressed with the ease of installation and the ability to sod directly on top of the EZ Roll. This allowed him to establish the turf immediately, without waiting for seed to take root, which was important to the Grounds Department. They could not have the front of the casino appear barren, and were concerned about pedestrians walking on the seeded soil as that area was accessible to the public.

Project Photos & Design Details

Placement of the 6" of 2A material has been completed and the area is ready for EZ Roll.

Standard 4' x 150' rolls help maximize production and minimize joints.

After sod placement the area is available for use and accessible to the public.
