

Cache Creek

In May of 2017, the Cache Creek Casino Resort announced plans to greatly expand their property to include more hotel rooms, event spaces, a new restaurant, and a second pool. To meet the hotel's safety standards, this new development needed emergency vehicle access leading up to the spa and pool area.

To accomplish this goal, contractors had specified a Grass Paver system that would maintain the lush, green aesthetic of the lawn. Although at the time contractors were planning on using a competing product, representatives from NDS reached out to project leaders and explained the advantages of using NDS EZ Roll Grass Pavers for this development.

NDS[®] EZ Roll Grass Pavers

Ideal Applications: Golf cart paths, residential driveways, parking lots, emergency vehicle or service access roads - also effective solution for erosion control on slopes and in swales

Designed to have high compressive strength and a relatively simple installation, EZ Roll Grass Pavers are composed of interlocking hexagonal cells that protect grass roots and prevent soil compaction. EZ Roll is sold in pre-assembled rolls that are compact and flexible – making them an ideal application along curved paths and sidewalks.

This design flexibility and ease-of-use was ultimately what swayed the contractors in favor of the NDS product. 12 Rolls of grass pavers were installed on-site, surpassing a total of 7000 sq. ft. of NDS EZ Roll. Now Cache Creek has a reliable path for emergency vehicles to reach the spa that doesn't break up the aesthetic of lawn.
