

Weinberg Cancer Center

The Weinberg Cancer Center at Medstar is an award winning cancer research and care facility located in Rosedale, Maryland. Providing cutting edge technology, clinical trials, and advanced treatments, the Weinberg Cancer Center is committed to creating a community environment that supports cancer patients as well as their families.

When staff at Weinberg discovered that areas of the 1st floor were experiencing flooding after heavy rain, it became immediately apparent that they would need a new drainage system that could handle the excess rainwater.

NDS[®] Filcoten Channel Drain

Popular applications including driveways, courtyards, plazas, pool decks, parking lots, sports facilities and more. Compatible with the patented NDS Pro Series Qwik-Turn Radius Coupling to allow for curving layouts with up to 6 degrees of deflection between couplings and channels – NDS is the only drainage manufacturer to offer this incredible ability!

Kroh's Nursery, the contractor tasked with the installation, was recommended NDS Drain Solutions by their parts distributor. After contacting NDS, representatives cooperated with Kroh's Nursery to find a product that would solve their flooding problem. It was eventually decided that a combination of Filcoten Channel Drains and a sump pump system would be installed along an affected sheet wall to convey rainwater out of the building. Made from pure concrete, Filcoten Channel Drains offer a more durable alternative to polymer concrete channel drains that incorporate plastic.

After installing the sump pump and 130 linear feet of Filcoten, Kroh's Nursery had completely solved the flooding problem at the Weinberg Cancer Center.
