

Sulphur Springs, TN

In one of the fastest growing housing markets in the country, Murfreesboro, Tennessee, there are a number of high-end private residences. Mullin-Watson Builders is a custom home builder with a strong reputation in the area, so they were selected to construct this sprawling 26,000+ square foot home to which the crowning jewel is this custom concrete swimming pool. Mullins-Watson was initially interested in using a pre-sloped channel to maximize water flow but the owners were concerned about seeing a drainage grate set into their beautifully designed patio. The owner found their solution in the NDS Spee-D Channel System, accented with the Tan-colored Botanical pattern grates which they selected themselves.

Combining a compact, reinforced channel and terrific grate options that support light vehicle loads, the Speed Channel is ideal for commercial and residential applications alike. The Speed Channel offers a variety of optional accessories that maximize water flow efficiency. At the end of the project, two separate 50' runs were installed around the exterior of the pool amounting to a total of 100 sq feet of Speed Channel.
