

## Professional Athlete Uses NDS Solution to Create Extra Parking Space on Residential Property

**Project Name:** Roxborough Park Grass Paver Parking

**Location:** Littleton, CO

**Property Size:** Residential <1 Acre

**Products:** Permeable Pavers

**Property Type:** Single Family Residence

**Partners:** Down to Earth Landscaping

### Challenge: Resident needed to add extra parking to yard without damaging lawn

In a small suburb outside of Denver, a professional baseball player put in a special request with Down to Earth Landscaping. He and his family lived in a beautiful community with plenty of space in their home for entertaining but had difficulty accommodating guest parking. With limited parking space in the driveway and a homeowner's association that does not allow parking on the street, the homeowner turned to his landscaping company to come up with a creative solution.

### Solution: Grass pavers offer perfect parking spot

The contractor had previous experience with the NDS team and the company's EZ Roll Grass Paver solution – a turf reinforcement, load transferring paving system, available in easy to install pre-assembled rolls. These rolls are 25% stronger than the competition – and have been tested for compressive strength at 53,683 lbs. bare product, meaning EZ Roll Grass Pavers do not rely on the fill material for load carrying. Plus, they allow for the use of loamy soil, which means healthy grass can thrive.

### Impact: Ease of installation and NDS support team made for easy process

EZ Roll Grass Pavers are extremely easy to use, the product simply rolls out and gets pinned down, saving time on installation and the end result looks amazing. The homeowner now has a solution to his parking issue, while still having a nicely landscaped yard. The homeowner was also pleased that an NDS specialist was on-site during installation providing general service and support.

*"Wow, that was easy. Thanks for coming out and bringing food for my crew."*

– Owner, Down to Earth Landscaping
