Tufftrack® Grassroad Paver 7,000 sq. ft.

ADDRESS

9241 Laguna Springs Drive
Elk Grove, California 95758

APPLICATION

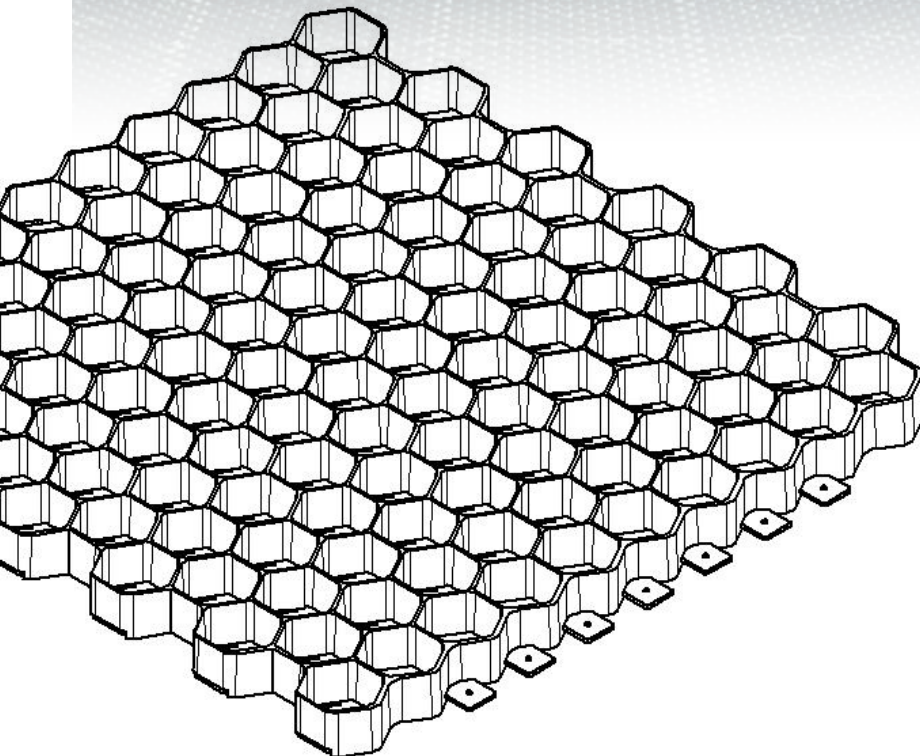

Emergency Access Lane

INSTALLATION DATE

July 1999

OWNER

Hilton Hotels Corporation

Project Information

In 1999, the owners of the Hilton Garden Inn in Elk Grove, CA hired a contracting company to install an Emergency Access Lane extending along the side of the property. Due to the large width of the lane and its proximity to the hotel, the owners explored paving options that would be not only functional but aesthetically pleasing to guests of the hotel.

Tufftrack Grassroad Pavers were selected for the job and installed.

Twelve years later, the site was revisited so a visual assessment of the area could be conducted. As shown in the pictures, the area with the Tufftrack base is virtually indistinguishable from the rest of the landscape. The grass is thick and green. They not only have a highly functional fire lane but the area remains a space that can be enjoyed by their guests when not in use.
