

## We Can Assist You With Your Stormwater Management Plan

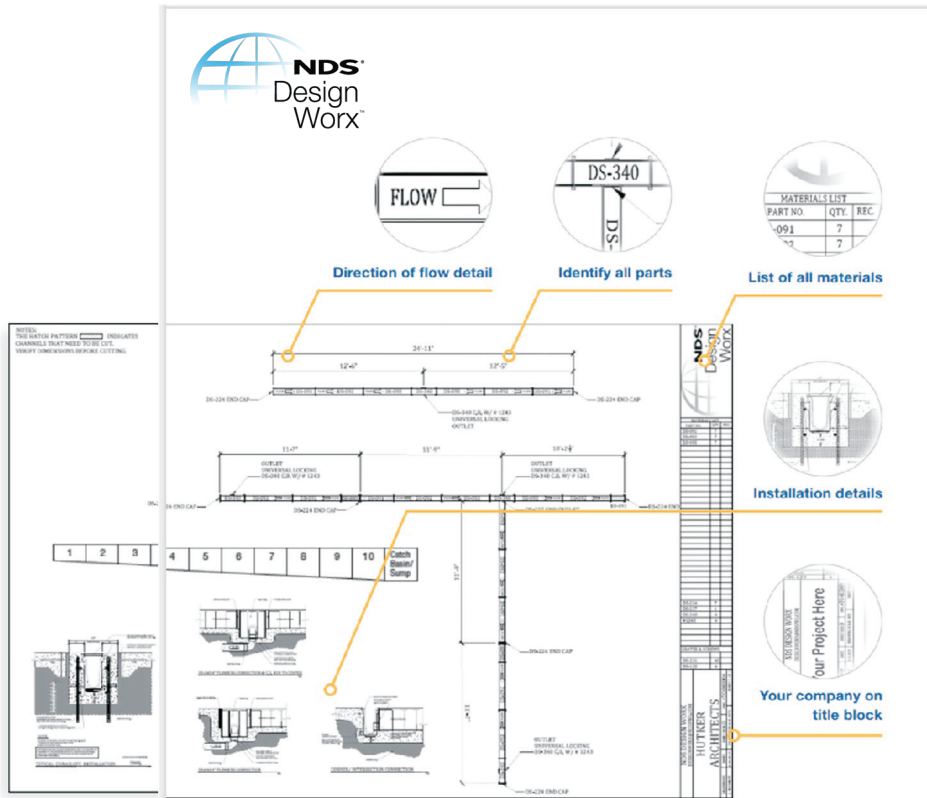

- Calculations
- Specifications
- Consultations
- Documentation

YEARS AS YOUR KNOWLEDGEABLE  
AND TRUSTED PARTNER IN WATER  
MANAGEMENT SOLUTIONS.

# Get Comprehensive Project Support for any size project, and at any phase

The Design Worx® services team works with designers and specifiers to address complex challenges and develop comprehensive solutions.

## Design Worx® Services Include:

### Calculations

- Runoff volume flow rates
- Aid in sizing a drainage system
- Storage requirements

### Specifications

- Best product for the application
- Complete overview of parts and materials
- Load rating requirements
- Competitive crossover or NDS equivalent

### Documentation

- Submittal packet
- Layout drawing of the proposed NDS system
- CAD or DWG files if needed
- Installation instructions and technical specs

### Consultations

- Design or application input and aid in regulatory compliance
- Project and product research support
- Material takeoffs and budgetary pricing
- Plan review

# Success Stories

From storm chambers to pavers to channel and trench drains, our goal is to recommend the best solution for the project while simplifying the process, saving time, and reducing costs.

## Here are a few highlights from our case studies:

### Designed to Meet the Rigors of a Fire Station

For a fire station in the town of Halfmoon, NY, the project needed to meet appropriate regulatory codes and unique demands enforced by the state's fire marshal. The Design Worx® team provided a comprehensive plan using BG-FILCOTEN® trench drains—a fireproof drain engineered with high-performance concrete.

### Stormwater Detention with a Smaller Footprint

This multibillion-dollar project at the San Diego International Airport required storage for large volumes of water. Typical open surface detention systems were not allowed due to the attraction of birds near an airport.

The specifier chose to work with the Design Worx® team, and they were able to provide a comprehensive layout showcasing a StormChamber™ system. By tapping into the services from the Design Worx® team, the specifier kept the project on task and under budget.

### Comprehensive Submittal Packet Facilitated a Quick Review and Signoff

The designer for the Thibodaux Wellness Center needed an alternative to traditional pavement for an 11,000 sq. ft. emergency vehicle lane. EZ Roll® Grass Pavers stood out from the competition for its ability to handle heavier loads while reducing runoff.

The Design Worx® team, local district sales manager, and specification manager collaborated on the submittal packet. The contractor then submitted all documents for approval, and the specifier was able to quickly review and sign off on the plan.

## How It Works:

Submit your design file online and tell us about your project. Our team will provide feedback, evaluate your plans for the most ideal outcome, and help in preparation of submittal drawings.

**Submit Your Design**

The NDS DesignWorx Team is available at every step of the design process. Let us take the guesswork out of your project specifications and show you how NDS products can help reduce costs and save time.

**Step 1: Request complimentary design support**  
Simply fill out the form and tell us about your project in the "How can we help" section.

**Step 2: Upload a file**  
If you have a file to share, upload your file in the "Optional file upload" section. We accept: PDF, DWG, DOC, JPEG, PNG file types.

**Step 3: We'll get in touch with you**  
One of our NDS technical specialists will contact you as soon as possible. Please excuse any delay as we deal with increased volume during Covid.

Easy upload of CAD or PDF design files
