

NDS Gravel Paver Installation Offers Budget Savings in Plaza Area at Sofi Stadium

Project Name: Sofi Stadium

Location: Hollywood Park, Inglewood, CA

Property Size: Commercial – Large (>10 Acres)

Products: Pavers

Property Type: Sports Complex/Stadium

Partners: Brightview Landscape, HKS Architects, Turner Construction, David Evans & Assoc.

Challenge: Stadium's plaza area required cost-effective and inconspicuous drainage remedy

Home to the Los Angeles Rams and Chargers and the first indoor-outdoor sports complex to be built, Sofi Stadium construction kicked off in 2016 and wrapped in 2020. It sits at the center of almost 300 acres of mixed-use land still under development. As part of the stadium's design, the plaza area just past the gate entrance required a discreet drainage option for additional water runoff.

Solution: NDS gravel pavers offered architect and builder low impact design option

The project team was working on a tight timeline and ultimately chose NDS EZ Roll gravel pavers. Available for quick order, EZ Roll gravel pavers are a permeable paving solution often used on low impact development site designs to reduce impervious cover and storm water runoff. NDS EZ Roll pavers lead the market in compressive strength and can handle H20 traffic loads prior to filling with stone. The system's strength comes from the nested hexagonal cells, Tytar backing and steel anchors. The product provides an attractive, cost-effective and durable alternative to traditional paving and is supplied as a 4' x 149' long roll to greatly reduce installation time. For this particular project, 20 rolls of GP4-150 pavers were installed on an engineer specified road base and then filled with 3/8" semi angular stone to complete the park plaza area.

Impact: Impervious gravel surface attractive solution with excellent cost-savings

Using NDS EZ Roll gravel pavers were not only quick and easy to install, but they offered labor savings on the installation when compared to other pavers. In addition, the pavers helped maintain a specific look at the stadium while still enabling permeability.

"Working on a very short timeline, the NDS EZ Roll gravel pavers were selected based on being a cost-effective solution that was available within days of placing the order. Also, working with the NDS team was key, as they followed the order through its steps and kept the Brightview team updated. The labor savings was a huge plus for the overall budget."
