

EZ ROLL™ GRAVEL PAVERS

EZ Roll™ Gravel Pavers are a load transfer paving system designed to be placed directly on a clean stone or sandy gravel base, allowing light to heavy vehicular traffic to travel over without damage. EZ Roll™ Gravel Pavers can be used for erosion control and help reduce or eliminate surface water runoff.

EZ Roll™ Gravel Pavers include a fabric covering that is heat bonded to the bottom surface and allows water to drain freely into sub grade. The pavers are packaged in rolls that can be rolled out over the base materials, allowing for easy installation and savings on labor costs. 40 stakes for anchoring the panels together are provided with each roll; additional stakes can be purchased separately.

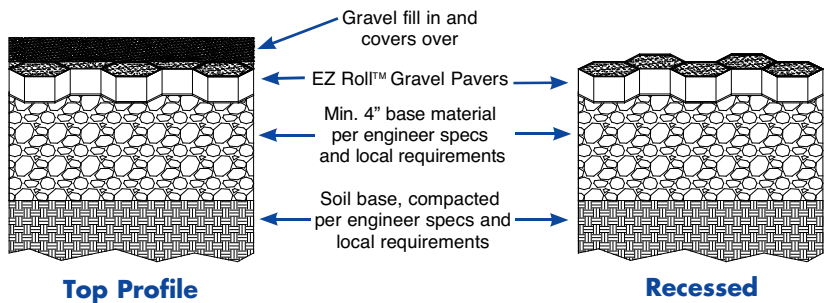

Specifications: NDS EZ Roll™ Gravel Pavers is a high quality injection molded, plastic rolled gravel paver structure of linked and nested honeycomb cells. The product is made from up to 100% recycled HPDE plastic with UV inhibitors. Pavers come in pre-assembled rolls, and a lateral snap lock latching system securely connects paver panels together to create an integral paver mat. Pavers must have an ultimate compression load rating of 66,000 psf (empty).

Part No.	Description	Color	Pkg. Qty.	Wt. Ea. (lbs.)	Product Class
GP4X150	EZ Roll™ Gravel Pavers, 4 ft. x 150 ft. roll, 600 sf total	Black	1	360.00	55GP
GP4X150G	EZ Roll™ Gravel Pavers, 4 ft. x 150 ft. roll, 600 sf total	Gray	1	360.00	55GP
GP4X150R	EZ Roll™ Gravel Pavers, 4 ft. x 150 ft. roll, 600 sf total	Brick Red	1	360.00	55GP
GP4X150T	EZ Roll™ Gravel Pavers, 4 ft. x 150 ft. roll, 600 sf total	Tan	1	360.00	55GP
GPSTAKE	EZ Roll™ Gravel Paver Stake	Raw Steel	60	23.40	55GP

Typical Base Course Materials

A mixture of stone and sand or a sandy gravel material allows for a free-draining structural base for use in light to heavy load applications. A clean stone base contains most void space for storage of stormwater and minimizes or eliminates runoff. A clean stone base may be used for light to moderate load applications only.
