RP Series
ROOT BARRIER PANELS

Modular extruded root barrier panels
Features built-in self-locking panel-to-panel connection and root deflecting ribs

Circular Application
Linear Application
RP Series Root Barrier Panel

is an extruded High Impact Polyolefin modular root barrier panel, with a one-piece design that includes an integrated interlocking joint. Suitable for all planting installations, the RP Series is available in 12”, 18”, 24”, and 36” depths.

RP Series Root Barrier Panels are the perfect solution for contractors accustomed to using competitive products from Villa Landscape and Century. The RP Series functions the same with greater benefits.

Specifications: Product shall be RP Series Root Barrier Panels by NDS. Panels must have integrated interlocking joints. Barriers must be a minimum of .080 inches thick and be made of High Impact Polyolefin. Material must contain U.V. inhibitors to ensure longevity. Barriers must have ½” raised vertical ribs running perpendicular to the panel and be 6” on center.

Features

- Integral tongue and groove connectors
- Root deflecting ribs
- UV inhibitors

Applications

- Linear root
- Root pruning
- Surround

Benefits

- Does not sell direct to contractors
- Competitive pricing

Recommended Installations

Surround application: Panels to be placed around root ball, at a sufficient distance to allow proper backfill of materials.

Linear/root pruning application: Panels to be placed directly adjacent to the hardscape being protected.
