ROOTBARRIER PANELS

RP Series Root Barrier Panels
Are extruded High Impact Polyolefin modular root barrier panels, with a one-piece design that includes an integrated interlocking joint.

Suitable for all planting installations, the RP Series Root Barrier Panels are available in 12”, 18”, 24, 36 and 48 depths”.

Specifications:
RP Series Root Barrier Panels by NDS have integrated interlocking joints. RP Series Panels have a minimum thickness of .080 inches, and are made out of High Impact Polyolefin with built in U.V. inhibitors to ensure longevity. The RP Root Barrier Panels have 1/2” raised vertical ribs running perpendicular to the panel and 6” on center.

Recommended Installations:
Surround Application: Panels placed around root ball, at sufficient distance to allow proper backfill of materials.
Linear/root pruning Application: Panels placed directly adjacent to the hardscape being protected.

Note: All dimensions are nominal. All weights are for shipping purposes only. Availability is subject to change.
