

Cuatro-Flo™ Pressure Compensating Four Outlet Manifold

APPLICATION

- The Cuatro-Flo™ is a pressure compensating four-outlet manifold with distinct flow rates that is perfect for watering a cluster of plants.

FEATURES

- ½" FPT inlet and barbed swivel outlets
- The outlet elbows swivel to direct the water where it is needed.
- The Cuatro-Flo™ can be buried or used above ground.
- Flow rates (per outlet): 2, 6, 10, 20 GPH

OPERATING RANGE

- Recommended system pressure: 15-50 PSI
- Filtration requirement: 150 mesh

SPECIFICATIONS

- ½" FPT inlet
- Barbs accept either .160" ID x .220" OD or .170" ID x .250" OD tubing

WARRANTY

- NDS Cuatro-Flo™ pressure compensating manifolds have a limited one-year warranty.
