Professional Water Management Solutions

Irrigation Joining Solutions | Drip Irrigation | Valve Boxes |
Landscape Solutions | Micro Irrigation

-  Over 50 years of experience bringing innovative water management products and solutions to the market
-  More than 2.500 professional water management products
-  Efficient irrigation solutions that enable water savings of up to 70 % compared to conventional irrigation systems
-  Sustainable manufacturing on different continents, using recycled materials and reducing energy consumption and waste.
-  Specialized expert team ready to help customers solve their project challenges

NDS IS YOUR KNOWLEDGEABLE AND TRUSTED PARTNER FOR THE BEST IN WATER MANAGEMENT SOLUTIONS

NORMA GROUP HOLDING GMBH

PROUD MEMBER OF

Welcome to efficient irrigation

Discover our extensive portfolio of water management solutions and enable water saving up to 70 % compared to conventional irrigation systems.

OUR MISSION IS TO PROTECT AND ENHANCE
THE VALUE AND BEAUTY OF PROPERTIES WHILE
PRESERVING WATER FOR FUTURE GENERATIONS.

The success of your project starts here.

01 Irrigation Joining Solutions

01.
NORMA Group, the world's leading manufacturer of connecting solutions, now offers high-quality joining solutions to meet irrigation needs.

They are suitable for both landscape and agriculture based irrigation. The product offering includes compression fittings, ball valves, and several other joining solutions.

Categories & Key Products

Compression Fittings

High-performance compression fittings

- Complete range, certified for drinking water
- Suitable for highly demanding applications
- High UV and temperature resistance
- Fast and easy connection

[Page 08](#)

Ball Valves

High-quality nylon based ball valves

- Full flow design
- High UV resistance
- Higher resistance to mechanical impacts
- Available in blue and purple handle variants

[Page 38](#)

Threaded Fittings & Tank Fittings

One of the largest ranges in the market

- PN16 rated products
- Durable nylon based high-quality fittings
- Strong sealing effect
- Suitable for harsh weather conditions

[Page 41](#)

Clamp Saddles & Swing Pipe and Fittings

Ideal solution for branching from existing pipelines

- Two clamp saddles ranges to meet all irrigation applications
- High-quality products
- Used for landscape irrigation needs
- Complete branching solution for sprays and rotors installations

[Page 47](#)

Clamps for Water Solutions

A core category in which NORMA has a reputation for excellence

- Multipurpose clamps: hose connections, hydrants, water filtration and more
- Durable installation in record time
- High resistance against rusting
- Easy installation

High-performance compression fittings by NDS

- Ideal for high-pressure applications
- Fast and easy connection
- High UV and temperature resistance

- Perfect water tightness
- Locking nut for clinching system
- Safe and durable

Technical Information

Applications

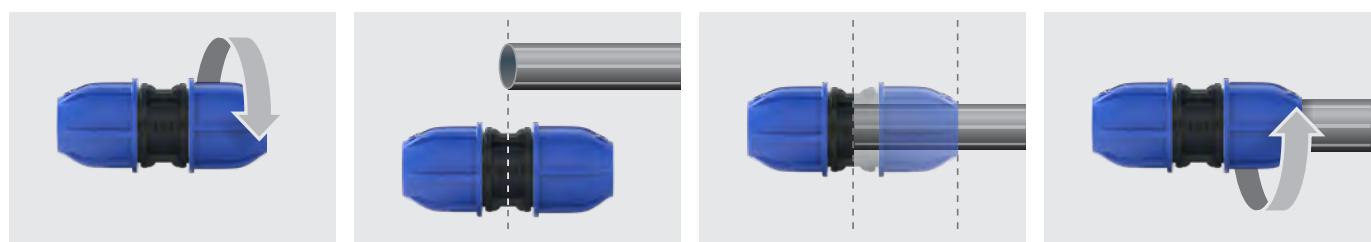

Ideally suited for more demanding irrigation applications like public parks, sports fields, golf courses and high-end agriculture-based irrigation. It is also suited for industrial applications.

Material

Body	Polypropylene	Working pressure: 16 bar (PN 16) up to Ø 63 mm and 12.5 bar for Ø larger than 63 mm.
O-Ring	NBR	
Holder	Polypropylene	
Clinching Ring	POM (Acetal)	
Locking Nut	Polypropylene	

Installation Tips

01 Unscrew the nut one or two turns or to the last thread.

02 Cut the pipe and deburr if necessary. Mark the insertion depth.

03 Push the pipe to the mark or the stop-end.

04 Screw the nut on tight. The nut can be tightened manually or using a hook tool.

Under Pressure Tapping Ferrule with Cutter

01.

Tapping Ferrule is the easiest way to tap water pipes and get a pressurized water exit.

Cutter included to self-cut the pipe

Cap for security of the pressurized exit

Connect with a clamp saddle to create a water outlet

Choose between threaded and compression joint outlets

Tapping Ferrule Installation Guidelines

NDS Telescopic Compression Fittings

Speed up the process of repairing a broken pipe!

- Ideal connection for repairing and taping into a PE pipe
- No additional components required for fixing the pipe
- UV stabilized to perform even in harsh sunny conditions

- Dual O-rings are used to ensure leakage-free connections
- Extensible telescopic function for easy and fast repair
- Innovative solution

Technical Information

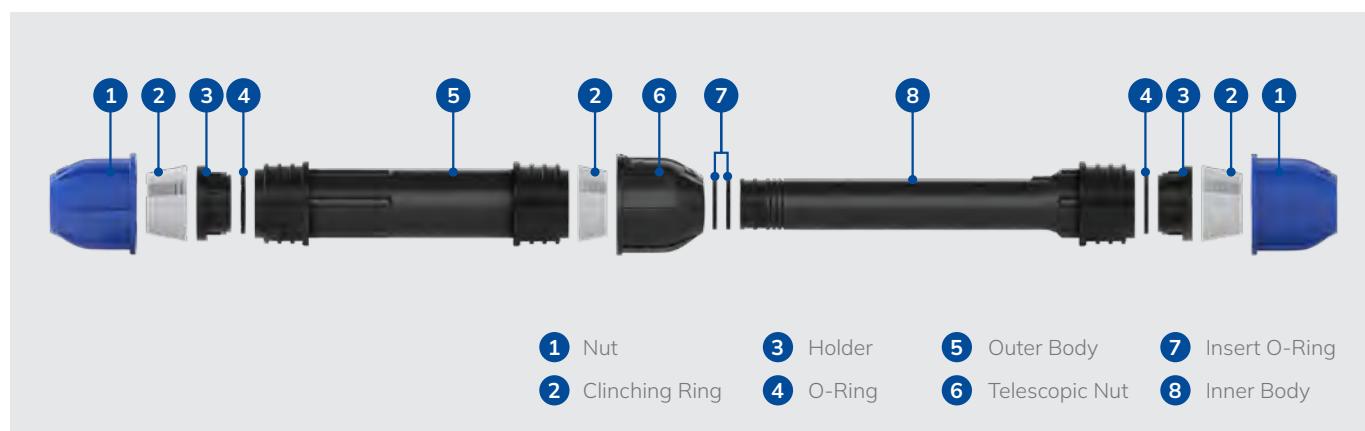

Applications

For repairing broken pipe sections while reducing the physical labour involved.

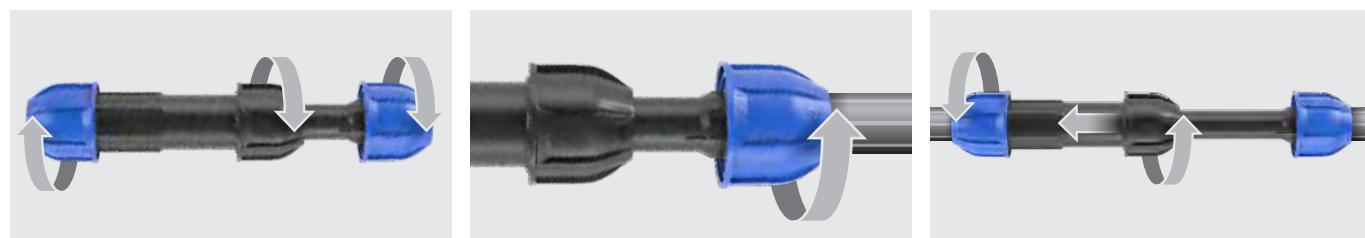

Material

Working pressure: 12.5 bar

Nut	Polyethylene	Outer Body	Polyethylene
Clinching Ring	POM (Acetal)	Telescopic Nut	Polyethylene
Holder	Polyethylene	Insert O-Ring	Nitrile Butadiene Rubber (NBR)
O-Ring	Nitrile Butadiene Rubber (NBR)	Inner Body	Polyethylene

Installation Tips

01 Cut the pipe as per the cut template.
Unscrew all nuts to the last thread.
Pull the O-rings into the relaxed position.

02 Slide the fitting over the pipe to the maximum insertion depth and tighten the nut.

03 Slide the outer body of the fitting to the maximum insertion depth until it extends over the pipe and tighten the blue nut. Tighten the black nut.

Installation Measures Information

Pipe Outer Ø (mm)	25	32	40	50
Maximum Pipe Cut-out Length (mm)	265	315	350	390
Pipe Insertion Depth (mm)	65	70	80	90

QuickTight
Technology

Speed up your water pipe installations
with QuickTight Technology!

- Certified for drinking water
- Push fit installation in all sizes
- Faster and easier installation
- Lip-gasket technology for superior performance
- Superior leak proof connections
- Durable materials, UV resistant

Technical Information

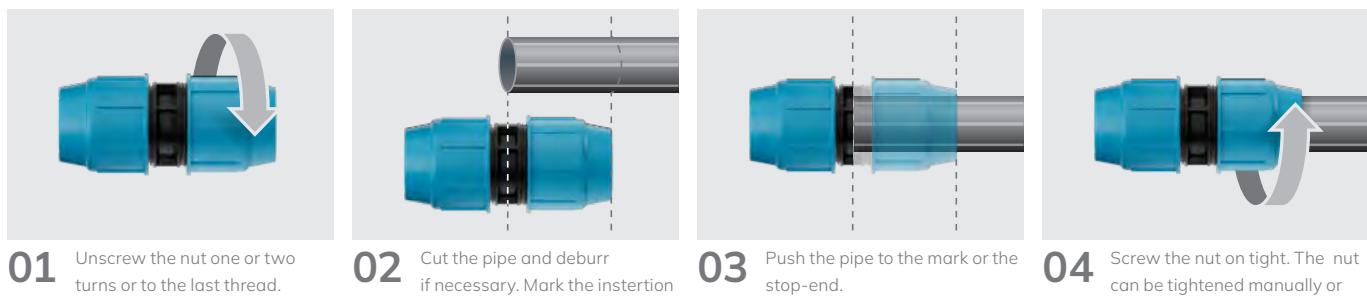

Applications

Ideally suited for connecting high- and low-density polyethylene tubing. These products are certified as compliant with international sanitary regulations for transport of drinking water according to DVGW, KIWA, ACS, WRAS and more.

Material	
Nut	Polypropylene
Bodies	Polypropylene
Clinching Ring	POM (Acetal)
Lip-Gasket	NBR

Installation Tips

NORMA MARLIN® Compression Fittings

are made in factories certified under ISO 9001:2018
according to UNI 9561-AS/NZS 4129-BRL-K17105 – DIN 8076 – ISO17885,
threads: UNI EN 10226-1 (ISO 7/1)

Female threads

ISO 7/1 Parallel

Male threads tapered 1:16

ISO 7/1 Conical

NDS PN 10

01.

**Cost-competitive high-quality compression fittings
for your needs**

- No special tooling required
- Perfect water tightness
- Easy connection
- Locking nut for clinching system
- High UV and temperature resistance
- Safe and durable

Technical Information

Applications

Ideally suited for residential landscape irrigation and for agriculture-based irrigation.

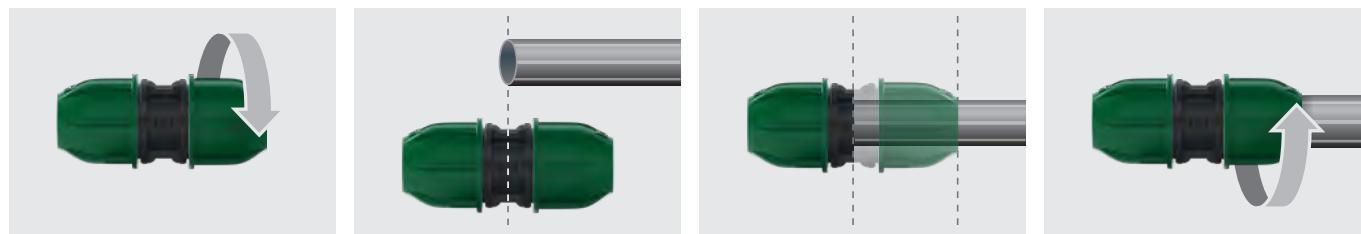

Material

Body	Polypropylene	Working pressure: 10 bar (PN 10).
O-Ring	NBR	
Holder	Polypropylene	
Clinching Ring	POM (Acetal)	
Locking Nut	Polypropylene	

- 1 Body
- 2 O-Ring
- 3 Holder
- 4 Clinching Ring
- 5 Locking Nut

Installation Tips

01 Unscrew the nut one or two turns or to the last thread.

02 Cut the pipe and deburr if necessary. Mark the insertion depth.

03 Push the pipe to the mark or the stop-end.

04 Screw the nut on tight. The nut can be tightened manually or using a hook tool.

NDS Ball Valve

01.

Exceeding performance, even in harsh conditions

- Innovative design of the ball valve allows full true passage in open condition
- Higher corrosion and frost resistance
- More efficient water discharge due to lower wall thickness of the nylon ball valve
- Removable handle prevents unauthorised manipulation of the valve
- Superior mechanical resistance due to nylon material
- Maximum operating temperature of 60° C

Technical Information

Applications

Perfect for all irrigation applications, especially for higher demanding installations like sports fields, large public parks, golf courses, large agricultural sites, etc. Can also be used in industrial applications.

Material

Working Pressure: 16 bar (PN16)

- Handle: Nylon
- Stem: POM (Acetal)
- Body: Nylon
- End connector: Nylon
- O-rings: NBR
- Seat: HDPE
- Ball: CPVC
- Male threaded connector (FxM): Nylon

High quality glass reinforced nylon construction

Guyco is a NORMA Group brand

Guideline for removing the handle

01 Turn the handle slightly clockwise

02 Put fingers below handle and pull it up at the same time, with thumb pushing down on valve body

NORMA Nylon Threaded Fittings

Perfect complement to the Nylon Ball Valves, same level of quality and strength.

Extended range of durable high quality threaded fittings

Manufactured from glass fibre reinforced nylon

The precision heavy-duty tapered threads deliver a strong sealing effect

Suitable for all irrigation applications, especially for use in harsh conditions

Guyco is a NORMA Group brand.

NDS Tank Fittings

01.

Specially designed to install the tank fitting tube for holding the tank piping applications

- Molded from highly UV stabilized, glass reinforced nylon or polypropylene (PP) materials
- Heavy duty tapered threads reduce cross-threading effects
- Resistant to a wide range of chemicals and bacteria
- Extensive range of sizes from 15mm – 100mm (1/2" to 4"), PN 12.5 rating

Guyco is a Norma Group brand.

Clamp Saddles & Complementary Irrigation Connections

Ideal solution for branching from existing pipes.

NDS Clamp Saddles with Stainless Steel Reinforced Ring

Polypropylene body with a reinforced stainless steel ring for extra strength and resistance

Bolts and nuts made of zinc plated mild steel to avoid corrosion

Working pressure of 12.5 bar for superior performance

Extended range for all irrigation applications

NORMA Clamp Saddles Non-Reinforced

01.

- Cost-effective high-quality clamp saddles
- Ideal for your regular needs in most irrigation applications
- Bolts made of zinc-plated mild steel to resist to corrosion
- Working pressure of 10 bar for great performance in most irrigation applications

NORMACLAMP® TORRO

01.

The industry's gold standard for more than 50 years

 Multi-range hose clamp

 Clamping ranges in acc. with DIN 3017:
8 – 16 mm to 140 – 160 mm

 No chromium (VI) used for
coating purposes

 Larger diameters available on request

Technical Information

Material

TORRO is well suited to applications involving poly and braided tubing that require a complete seal, e.g. for:

- Joining cooling water lines
- Depressurized and pressurized fuel lines and ventilation systems
- Joining lines in sanitary applications
- Joining lines in machine building applications
- Lines in the household appliance industry
- Oil lines

Material

NORMACLAMP® GBS

Exceptionally high level of band tensile force

Failure torques improved by a factor of two

Band tensile force levels improved by a factor of three

No welding spots and no contact corrosion

Hollow trunions – reduce tensile forces on the bolt and the mechanical lock

NORMAFIX® Cable Ties

01.

Quick and safe securing of cables

NORMAFIX® Cable Tie for securing cables in electrical installations, industrial wiring, water installations, etc. Resistant to extreme temperatures and numerous external agents. Quick and safe assembly.

- Made of polyamide 6.6 for optimum resistance to extreme temperatures, bases, oils, greases, etc.
- Bent rounded tip allows easier insertion through the head of the cable ties
- Low-friction material coefficient allows a faster installation

- Smooth round edges – easier to handle and safer to install
- Variety of colors – available in: black, white, red, yellow, green, blue
- “Carbon Black” added in black cable tie flange

Drip Irrigation

Introducing NORMA and NDS® Drip Irrigation, a series of efficient drip irrigation products that offers complete system-oriented watering solutions for the green industry.

The product offering includes driplines, drip fittings, drip emitters, and accessories.

Categories & Key Products

Dripline, Drip Distribution Pipes and Drip Fittings

Highly efficient complete solutions for landscape irrigation

- Self-flushing pressure compensating emitter
- Anti-siphon mechanism prevents suction of soil into the emitter
- Chemical-free root intrusion protection
- Durable under harsh conditions
- Resistance to UV radiation
- Large variety of fittings for drip irrigation

[Page 58](#)

Drip Emitters

Access to wide range of high-performance emitters

- Superior flow uniformity
- Self-flushing emitters minimise clogging
- Tool-free installation
- Pressure compensating and non pressure compensating options

[Page 68](#)

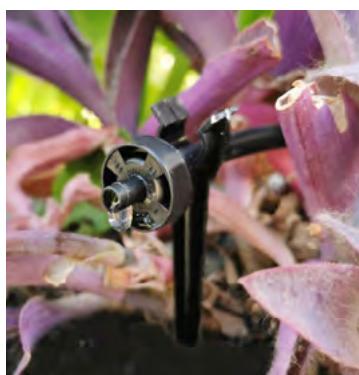

Drip Accessories

Diversified accessories that complete the drip solutions

- Easy to handle
- Superior performance
- Compatible with all drip systems
- Complementary sprinkler connection accessories

[Page 70](#)

Micro Irrigation

Check out our new TECO's catalogue 2025!

- Allow the delivery of precise amount of water directly to plant roots.
- Minimize waste from wind and evaporation.
- Use the minimum amount of energy.
- Reduce weeds and promote plant health

[Page 96](#)

NDS PC Dripline

High performance dripline for landscape applications

- PC – Pressure Compensating: Even distribution of water regardless of pressure fluctuations
- Anti cracking system, for long lasting installations
- Flexible pipe for easy and fast installation in all applications
- Durable under harsh field conditions and chemicals resistant
- Pressure working range 1.0 – 4.0 bar
- Minimal clogging due to self-flushing emitter design

Technical Information

Applications

Perfect solution for all landscape drip applications, specially recommended for demanding installations like public green areas, commercial applications and high-end residential irrigation systems

Material

Sustainable material: 100% recyclable polyethylene

NDS PC Dripline

NDS PC DRIPLINE 16 mm (PRESSURE COMPENSATING)	Flow: 2.1 lph	Emitters Spacing: 33 cm	
----------------------------------------------------------	---------------	-------------------------	-------------------------------------------------------------------------------------

Part number	Color	Ø DN (mm)	Thickness (mm)	Coil size (m)
08942410003	Brown	16	1.15	25 (wrapped)
08942410001	Brown	16	1.15	50 (wrapped)
08942410002	Brown	16	1.15	100 (wrapped)
08942410021	Dark Brown	16	1.15	100 (wrapped)

NOTE: We can quote different flow rates and different emitters spacing

02.

NDS PC DRIPLINE 17 mm (PRESSURE COMPENSATING)	Flow: 2.1 lph	Emitters Spacing: 33 cm	
----------------------------------------------------------	---------------	-------------------------	---------------------------------------------------------------------------------------

Part number	Color	Ø DN (mm)	Thickness (mm)	Coil size (m)
08942410091	Brown	17	1.25	50 (wrapped)
08942410092	Brown	17	1.25	100 (wrapped)

NDS CV Dripline

NDS CV Dripline combines the best of NDS PC Dripline with a Check Valve (CV), saving water by reducing water wastage

- Anti-siphon mechanism prevents suction of debris into the emitter
- Ideal for slopes: each emitter has a check valve that closes at 0.14 bar, holding back 1.4 m of elevation
- Allows for longer run lengths: working pressure starting at 0.5 bar
- Dripline remains full of water between irrigation intervals providing immediate and uniform irrigation at each irrigation cycle and avoiding low head runoff

AccuFlow™ PC

The most accurate pressure compensating emitter

- Superior flow uniformity
- UV resistant
- Durable self-flushing emitter
- Easy to hide in the landscape
- Working pressure compensation
Pressure: 1.0 to 3.4 bar
- Clearly marked and color-coded
for easy identification

03 Valve Boxes

NDS valve boxes span a wide variety of sizes from 6" round boxes to 17" x 30" rectangular boxes. They are available with black, green, purple, brown and sand covers with option of irrigation control valve or reclaimed

water designations. All valve boxes and lids contain UV inhibitors for sustained durability and performance in direct sunlight.

Categories & Key Products

NDS® Pro-Spec™ Series

Next Generation Commercial Grade

- Superior performance and durability
- Specification grade for professional application
- Option of Irrigation Control Valve (ICV) or Reclaimed Water labelled covers.
- Available in various color combinations
- UV resistance

Page 74

NDS Valve Boxes

Residential and Light Commercial Grade

- Lid shovel access slot for easy removal
- Knockouts for easy pipe access slots
- Locking system
- UV resistance

Page 80

03.

NDS Pro-Spec™ Series

03.

Superior strength with unique corrugated sidewalls

- Corrugated sidewalls provide higher strength
- Integrated nut for bolt-down capability
- Specification grade valve boxes for commercial applications
- High UV resistance prevents discoloration and cracking
- Reinforced covers for heavier loads
- Overlapping covers prevent dirt and grass from settling in between body and cover

ICV: Irrigation Control Valve (international reference for Irrigation Valve Boxes)

NDS Valve Boxes

Ideal solution for residential and light commercial applications

 Resistant to heavy loads

 UV resistance

 Fast access to the boxes with the easy open solutions

 Injection molded polypropylene construction

 Locking system included in rectangular valve boxes

 For use in residential and light commercial applications

NDS Universal SureFit™ Series Valve Box Covers

The new, patent pending, SureFit™ Universal Covers can fit virtually any kind of valve box on the market with a secure, confident fix you can count on.

- Fits on the vast majority of manufacturers' valve boxes and solves the issue of lost or broken covers
- Innovative SnapLock Grip Prongs, secure a perfect fit (include the image)

- Prominent lift tab allows to quickly remove the cover without tools
- No need to waste valuable time browsing for the right valve box cover

Landscape Solutions

NDS Permeable Pavers provide an alternative solution to traditional paving methods by creating a strong grass or gravel surface that can support heavy loads. They maintain permeable surface areas, eliminating or reducing water

runoff. Tree sustainability solutions protect sidewalks, driveways, and walls of buildings from damage arising from tree roots.

Categories & Key Products

Permeable Pavers

Cost-effective alternative solution to traditional paving methods

- Easy installation due to roll design
- High compressive strength
- Recyclable material
- Reduced maintenance

[Page 88](#)

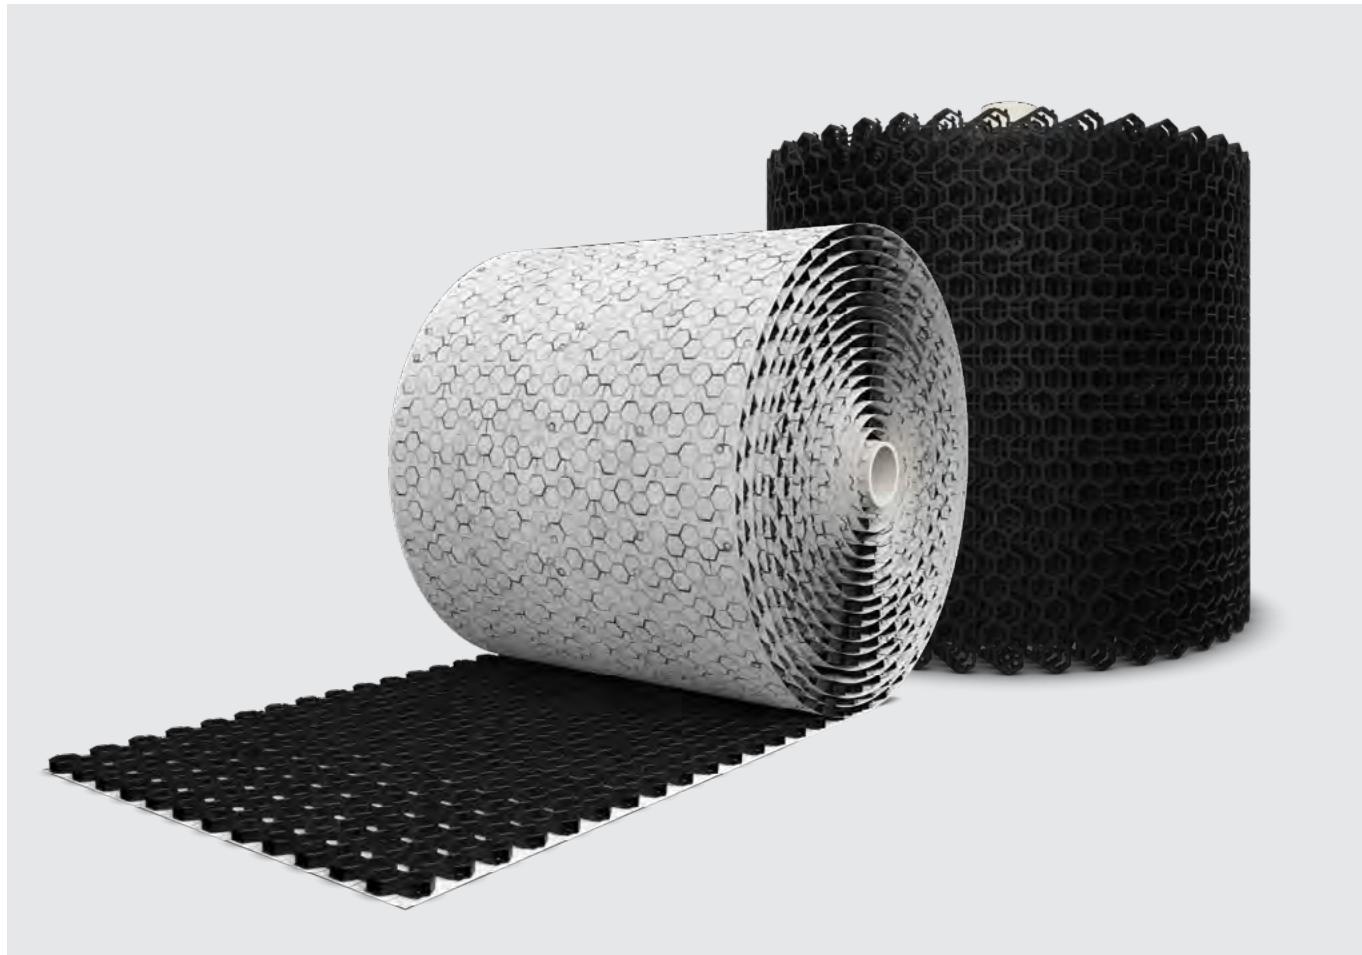

Tree Sustainability Solutions

Protects homeowners from high cost of repairs

- Easy installation
- Variety of solutions
- Recyclable material
- UV protection

[Page 92](#)

EZ Roll™ Grass Paver and Gravel Paver

Cut your installation time to a minimum by simply rolling out the product!

- Easy installation – EZ Roll™ products come in large rolls that are easy to lay and clip together
- High performance – UV inhibitors in the polymer prevent breakdown in paver strength
- High strength – heavy, above average, load capacity

- Environmentally friendly – EZ Roll™ prevents soil compaction that inhibits healthy root growth
- Enhanced aesthetics – Pavers blend into the environment, minimizing water runoff and soil erosion
- Reduced maintenance – less expensive to maintain over time

MORE!

Technical Information

EZ Roll™ Pavers

Note: Different lengths – please refer to the tables

Applications

A turf-reinforcing, load-transferring paving system designed for:

- Golf cart paths
- Garage entrances
- Overflow parking areas
- Roadway shoulders
- Emergency vehicle access roads

Material

100% recycled HDPE plastic (50% pre-consumer, 50% post-consumer). HDPE is rugged, flexible and ideally suited for outdoor exposure and longevity.

Compressive strength

- Grass Pavers have a compressive strength of 24 kg / cm² in an empty condition and more than 181 kg / cm² when filled with native topsoil.
- Gravel Pavers have a compressive strength of 24 kg / cm² in an empty condition and more than 226 kg / cm² when filled.

Installation Guideline

Roll it out

Manufactured in pre-assembled rolls for fast and easy installation on prepared base.

Clip it together

Lateral snap-lock system allows rolls to be connected without special tools.

Fill it

- Top with sod or seed per local standards.
- Use clean gravel that is uniform in size, 1 cm angular stones work best.

Tree Sustainability Solutions

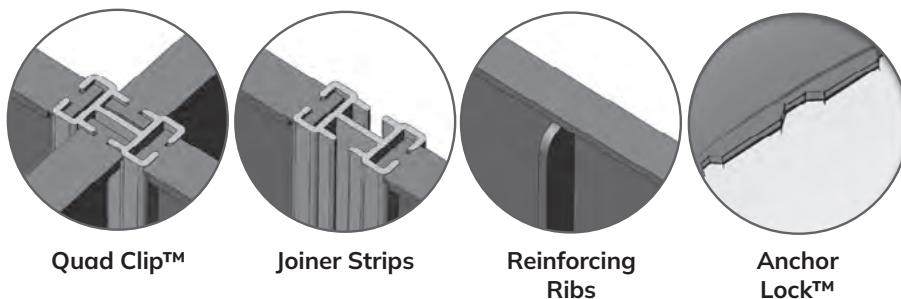

Tree sustainability solutions include root barrier systems which help in directing the roots from shrubs and trees to grow downwards. This dramatically decreases the

roots' potential to damage sidewalks, driveways, building foundations, etc.

Modular EP Series Root Barrier Panels

- Panels with a 10 mm wide "T" top edge and an external ground anchoring base flange 3 mm width
- Each barrier is a minimum of 2.3 mm thick and is made of up to 50% post-consumer High Impact Polypropylene (HIPP) with UV inhibitors to ensure longevity

- Barrier Panels with 13 mm raised vertical ribs running perpendicular to the panel and that are 15 mm on center
- Factory installed independent joiner strips

Root Barrier Roll

- Easy and fast to install rolls
- Manufactured from up to 50% recycled HDPE with UV inhibitors and a thickness of 1–1.5 mm
- Vertically integrated and flared moulded 90° root deflecting ribs that protrude 13 mm from the wall and are placed 15–20 cm apart
- Root impervious moulded end that provides easy assembly using staples or a sealant designed to bind to HDPE (dual sided solvent based tape)

Ottima™ 360°

Adjustable 8 Stream Drippers

FEATURES and BENEFITS

- Rotation of the Ottima™ 360° cap allows simultaneous adjustment of flow rate and diameter of throw. Easy to increase or decrease the stream pattern.
- Gives a greater control of flow rate and diameter of throw compared to fixed flow emitters.
- Quick ON-OFF action.
- Four base options available, 4.5 mm Barb, 10-32 UNF Male Thread, 1/2" Female Thread and Spike.

APPLICATIONS

- Use for watering plants in small or large pots, planter boxes and also shrubs and trees in garden beds and landscaped areas.

Ottima™ Spike PC - 360° & 180°

Pressure Compensating Stream Drippers

FEATURES and BENEFITS

- Pressure Compensating Spike emitters with pre-defined discharge rates that maintain uniform output flow rate and diameter of throw when the inlet pressure of the supply system varies.
- Two Spikes are available: End-Line and In-Line, Colour Coded for easy identification
- Two Caps available: Ottima™ 180°, 5 Stream and Ottima™ 360°, 8 Stream
- The End-Line Ottima™ Spike PC 180° is available in three discharge rates, 20 l/h (**Black**), 30 l/h (**Orange**) and 40 l/h (**Blue**).
- The In-Line Ottima™ Spike PC 180° is available with two discharge rates, 20 l/h (**Black**) and 30 l/h (**Orange**)
- The End-Line Ottima™ Spike PC 360° is available with two discharge rates, 30 l/h (**Orange**) and 40 l/h (**Blue**).
- The In-Line Ottima™ Spike PC 360° is available with one discharge rate, 30 l/h (**Orange**)

APPLICATIONS

- Use for watering plants in small or large pots, garden beds and landscaped areas.

Umbrella Pattern Emitters, Adjustable & PC

FEATURES and BENEFITS

- Rotation of the Mini Bubbla cap allows simultaneous adjustment of flow rate and diameter of throw. This action produces a uniform umbrella pattern that gently applies water to the root zone of the plant.
- Four base options available for the Adjustable Mini Bubbla 360°, 4.5 mm Barb, 10-32 UNF Male Thread, 1/2" Female Thread and 150 mm Spike. Cap rotation adjusts flow and radius.
- Effective watering at the root zone.
- Easy to regulate the water flow.
- The Mini Bubbla 360° PC Spike is available in one discharge rate, 75 l/h, colour coded (Red).

APPLICATIONS

- Use for watering plants in small or large pots, garden beds, street trees and palms.

Mini Bubbla 360°
Adjustable Spike

Delta™ Drip

Adjustable Drip Emitter (Registered Design)

FEATURES and BENEFITS

- Rotation of the key in the body adjusts the flow rate from 0 to 6 l/h at 100 kPa. Flow rate may be increased or decreased until final shut off.
- Turbulent flow path.
- Two key types available:
 1. End-Line Adjustable 0-6 l/h key. (**Black**)
 2. In-Line Adjustable 0-6 l/h key. (**Brown**)
- Two body types to choose from depending on application:
 1. Standard body with 4.5 mm inlet barb.
 2. Spike with 4.5 mm inlet barb.
- May be turned "OFF" when not in use.

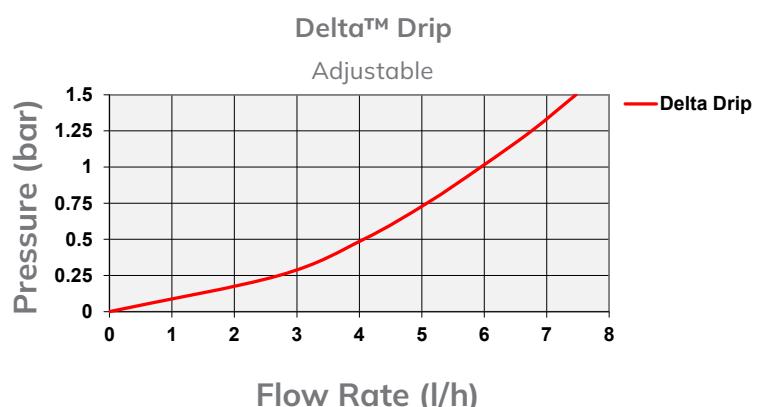

APPLICATIONS

- May be used for vegetable patches, home gardens, nurseries, pots and shrubs.

Pressure Compensating Drip Emitters

FEATURES and BENEFITS

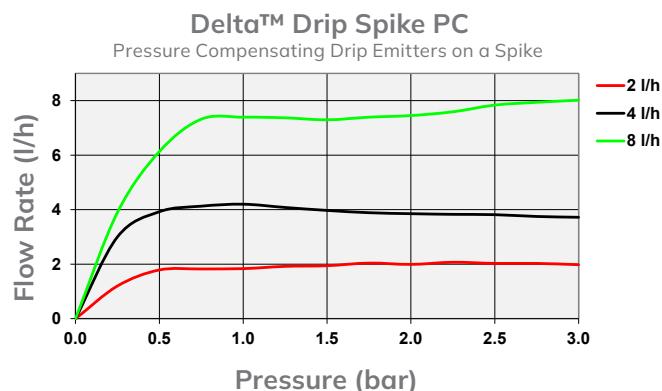

- Turbulent flow path pressure compensating drip emitters with pre-defined flow rates.
- Suit installations where slopes and changes of water pressure would otherwise require complex design systems and where uniform flow rates are required.
- Two Spike versions available:
 - End-Line with 4.5 mm Inlet Barb
 - In-Line with 4.5 mm Inlet & Outlet Barb
- Three flow rates available for each spike type, Colour coded for easy identification:
2 l/h (Red), 4 l/h (Black) and 8 l/h (Green)

APPLICATIONS

- May be used for vegetable patches, home gardens, nurseries, balconies and patios.

Adjustable Vortex Sprays

FEATURES and BENEFITS

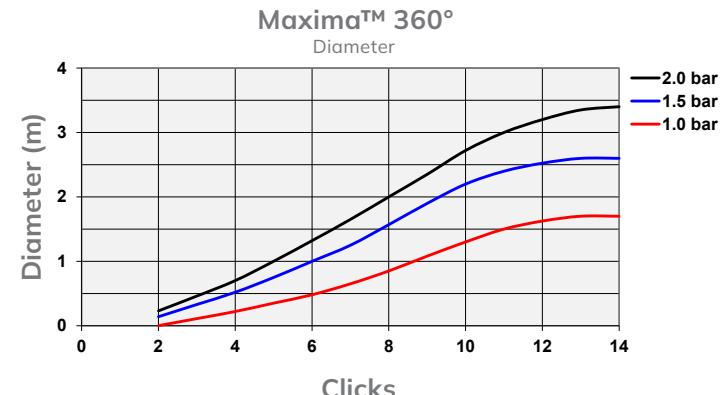

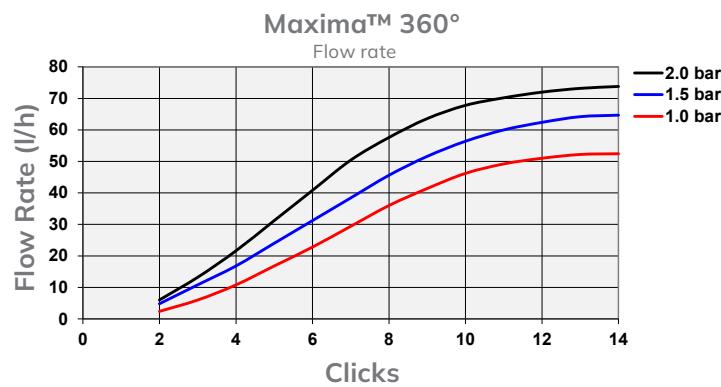

- Rotation of the Maxima™ 360° cap allows simultaneous adjustment of flow rate and diameter of throw. The ratchet clip action between the cap and the base allows the vortex pattern to be increased or decreased until final shut-off.
- Four base options available, 4.5 mm Barb, 10-32 UNF Male Thread, 1/2" Female Thread and 150 mm Spike.
- Vortex action distributes water evenly over the irrigated surface.

APPLICATIONS

- Ideal for spot watering of plants in small and large pots or larger areas including garden beds and landscapes.

Adjustable Spray Jets

FEATURES and BENEFITS

- Rotation of the valve rotor allows simultaneous adjustment of flow rate and radius of throw.
- Available in 6 spray patterns: 90° Fan Spray, 180° Fan Spray, 360° x 18 Hole Stream Spray, Strip 20° x 2, Mini Vortex and Micro Mist
- Two ranges available: **Coloured** residential range for easy spray pattern identification.
Black professional range.

APPLICATIONS

- Watering of landscaped areas.
- Easily adjusted to suit irregular shaped garden beds

Aquila™ Jet Spike (Registered Design) & Idra™ Jet Spike

Adjustable Spray Spikes

FEATURES and BENEFITS

- Pre-assembled Jet Spikes. Rotation of the Rotor allows simultaneous adjustment of flow rate and radius of throw.
- Available in three spray patterns: 90° Fan Spray, 180° Fan Spray and 360°x 18 Hole Stream Spray
- Spike lengths available: 200 mm and 310 mm for the Aquila Jet Spike and 310 mm for Idra Jet Spike
- Rigid Riser lengths: 200 mm for Aquila™ Jet Spike and 300 mm for the Idra™ Spike
- The Rigid Riser used with the Idra™ Spike may be raised or lowered inside the stake to suit the height of the plants being irrigated.
- Flexible PVC tube length: 500 mm

APPLICATIONS

- General watering of landscaped areas.

Rigid Riser may be raised or lowered inside the stake to suit plant heights

Caps and Bases

FEATURES and BENEFITS

- Caps available in four spray patterns
- 90° Fan Spray - Cap colour - **Black**
- 180° Fan Spray - Cap colour - **Black or Blue**
- 180° Fan Spray (Flat Trajectory) - Cap colour - **Red**
- Strip Spray 20° x 2 - Cap colour - **Black**
- 360° x 18 Hole Stream Spray - Cap colour - **Black or Red**.
- Eight colour coded bases with "FAST" thread for quick and easy installation.
- A large range of flow rates may be achieved at different operating pressures.
- Base colour identifies flow rate.
- Caps and bases may be ordered separately.

APPLICATIONS

- Ideal for landscaped gardens and garden beds.

Aquila™ Jets

Micro Sprays

FEATURES and BENEFITS

- Two Piece micro sprays with excellent watering patterns that distribute water evenly over the irrigated surface.
- Optimum performance is achieved at low operating pressures.
- Winged bases are easy to install by hand, eliminating the need for tools.
- Five spray patterns available for the Aquila™ Jet Winged Bases.
- 90° Fan Spray - Cap colour - **Black**
- 180° Fan Spray - Cap colour - **Black or Blue**
- 180° Flat Trajectory Fan Spray - Cap colour - **Red**
- 360° x 18 Hole Stream Spray - Cap colour - **Black or Red**.
- Strip 20° x 2 - Cap colour - **Black**
- Eight colour coded bases with "FAST" thread for quick and easy installation. Base colour identifies flow rate.
- Aquila™ Jet Mini Vortex (the vortex action distributes the water evenly over the wetted surface).
- Aquila™ Jet Micro Mist (ideal for cooling operations).

APPLICATIONS

- Landscaped areas and garden beds. Ideal where fixed flow rates are required at specified operating pressures.

Aquila™ Jet
Two Piece Micro Sprays

Aquila™ Jet PC

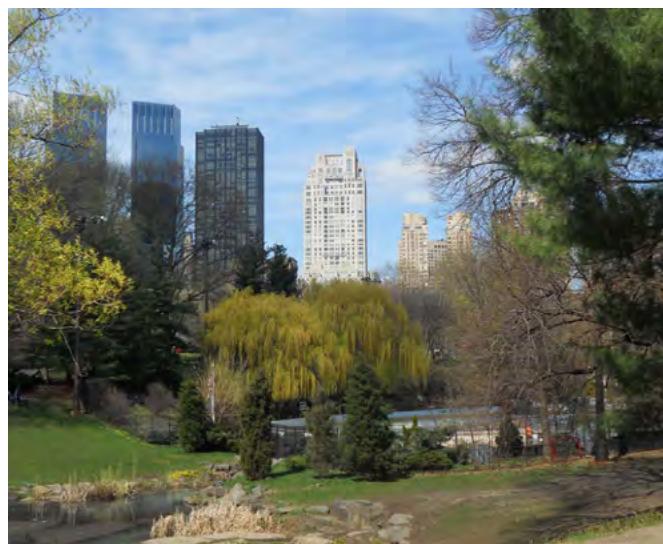

Pressure Compensating Sprays

FEATURES and BENEFITS

- Pressure Compensating Spray Jets with excellent watering patterns and pre-defined flow rates. Ideal where uniform flow rates and constant diameter and radius of throw are required. Best performance is achieved between 1.5 bar and 3.0 bar.
- Six colour coded PC bases with pre-defined flow rates. Colour identifies flow rate. 20 l/h (**Black**), 30 l/h (**Orange**), 40 l/h (**Blue**) 50 l/h (**Violet**), 55 l/h (**Green**) and 80 l/h (**Red**)
- Four Spray Patterns available: 90° Fan Spray, Cap colour (**Black**) 180° Fan Spray, Cap colour (**Black & Blue**) 180° Flat Trajectory Fan Spray, Cap Colour (**Red**) 360° x 18 Hole Spray, Cap colour (**Black & Red**)
- 10-32 UNF Thread connection.

APPLICATIONS

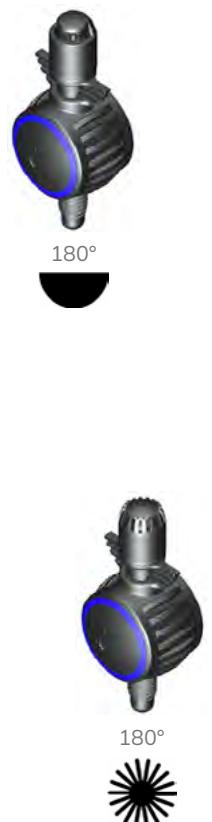

- Watering of landscaped areas and garden beds.

Pressure Compensating Sprays

FEATURES and BENEFITS

- Pressure Compensating Spray Jets with excellent watering patterns and pre-defined flow rates that distribute water evenly over the irrigated surface whilst maintaining constant diameter and radius of throw. This ensures efficient watering of the surface being irrigated.

Aquila™ Jet PC
Pressure Compensating Spray Jets

Flow rate (l/h) vs Pressure (bar) graph showing the relationship for various flow rates:

- 80 l/h (red line)
- 55 l/h (green line)
- 50 l/h (magenta line)
- 40 l/h (blue line)
- 30 l/h (orange line)
- 20 l/h (black line)

Recommended operating pressure 1.5 bar to 3.0 bar
Tested 200 mm above Ground

Single Piece Spray Jets

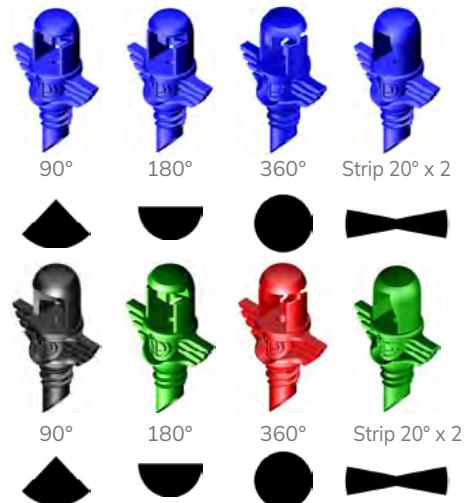

Micro Sprays

FEATURES and BENEFITS

- Single Piece micro sprays that distribute water evenly over the irrigated surface. Optimum performance and "matched precipitation" is achieved at 1 bar operating pressure. Winged bases with "FAST" thread are easy to install by hand eliminating the need for tools.
- Two colour coded sets, **Blue** and **Multi-Coloured**. Four spray patterns available per set.
- 90° Fan Spray
- 180° Fan Spray
- 360° Fan Spray
- Strip Spray

APPLICATIONS

- Watering of landscaped areas and garden beds.

Down Sprays & Stream Jets

TECO MICRO IRRIGATION CATALOGUE

Standard & Pressure Compensating Sprays

FEATURES and BENEFITS

- The strong "C" frame design allows for excellent water distribution uniformity.
- Two base types are available: Standard Base and Pressure Compensating Base.
- Five color coded Standard Bases.
- Six color coded Pressure Compensating Bases.
- Base color identifies the flow rate.
- Standard Bases and Pressure Compensating Bases may be combined with any Down Spray or Stream Jet.
- Assemblies made to order.

APPLICATIONS

- Ideal garden beds, landscapes, vegetable gardens and agricultural applications

FILTRATION REQUIREMENTS

- Black, Orange and Blue Bases:** 130 microns (120 mesh)
- Violet, Green and Red Bases:** 200 microns (80 mesh)

Down Sprays & Stream Jets

TECO MICRO IRRIGATION CATALOGUE

Shut-Off Adaptor Spray Assemblies

NEW RANGE

FEATURES and BENEFITS

- The strong "C" frame design allows for excellent water distribution uniformity.
- Five color coded Standard Bases.
- Five color coded Pressure Compensating Bases.
- Base color identifies the flow rate.
- The Standard and PC Bases are combined with the Down Spray 45°, the Shut-Off Tube, Steel Spike and Flexible Tube for easy and rapid installation.
- Assemblies made to order.

APPLICATIONS

- Ideal garden beds, landscapes, vegetable gardens and agricultural applications.

FILTRATION REQUIREMENTS

- Black, Orange and Blue Bases:** 130 microns (120 mesh)
- Violet, Green and Red Bases:** 200 microns (80 mesh)

Orbita Micro Sprinklers

Micro Sprinklers

FEATURES and BENEFITS

- The Strong "C" frame design allows for excellent water distribution uniformity.
- During rotation the spinner is supported between two bearings.
- The spinner on the inverted model has a cover that protects the bottom bearing from dust.
- Four Orbita micro sprinkler models available: Standard, Inverted, Adjustable and Spike.
- Six colour coded bases to choose from for the Standard model.
- Four colour coded bases for the Inverted model.
- Base colour identifies the flow rate.
- Two Adjustable models available:
 - Black Base with a Black Rotor**
 - Yellow Base with a Blue Rotor**
- The Spike is a pre-assembled model for quick and easy installation with a **Red Base**, an adjustable rotor for flow and throw control, 500 mm flexible tube and 4.5 mm Joiner. There are two spike lengths to choose from, 200 mm and 310 mm.

APPLICATIONS

- Ideal for large areas that include garden beds, landscapes, vegetable gardens and agricultural applications.

Orbita Micro Sprinklers

Pressure Compensating Sprinklers

FEATURES and BENEFITS

- Pressure Compensating Micro Sprinklers with pre-defined flow rates
- Ideal where uniform flow rates and constant diameter of throw are required.
- Colour coded bases 30 lph (Orange), 40 lph (Blue), 50 lph (Violet), 55 lph (Green) and 80 lph (Red).

APPLICATIONS

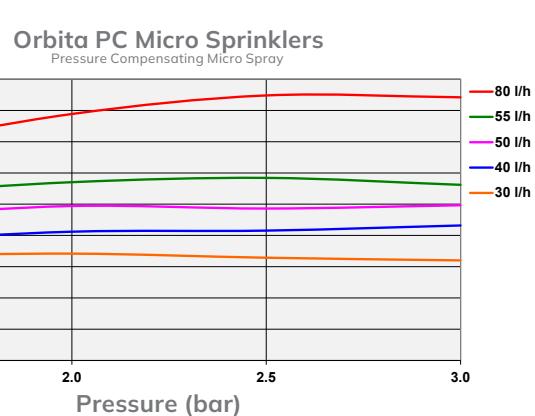

- Suitable for large areas that include garden beds, landscapes, vegetable gardens and agriculture applications.

Orbita Micro Sprinklers

TECO MICRO IRRIGATION CATALOGUE

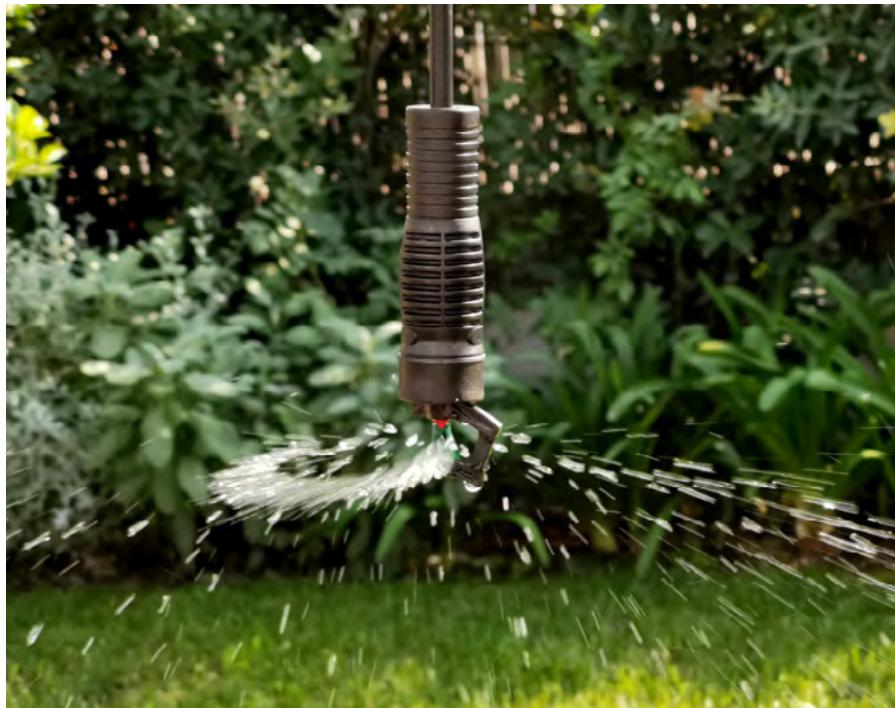

Micro Sprinklers

FEATURES and BENEFITS

- Two Orbita micro sprinkler models available: **Standard** and **Inverted**
- Eight colour coded barbed bases to choose from for both models.
- Base colour identifies the flow rate.
- Strong "C" frame design allows for excellent water distribution uniformity.
- During rotation the spinner is supported between two bearings.
- The spinner on the inverted model has a cover that protects the bottom bearing from dust.

APPLICATIONS

- Ideal for large areas that include garden beds, landscapes, vegetable gardens and agricultural applications

Orbita Micro Sprinklers

Inverted Micro Sprinkler Assemblies

FEATURES and BENEFITS

- The Strong "C" frame design allows for excellent water distribution uniformity.
- Inverted Orbita Micro Sprinkler with barbed base.
- Eight colour coded bases to choose from
- Base colour identifies the flow rate.
- During rotation the spinner is supported between two bearings.
- The spinner on the inverted sprinkler has a cover that protects the bottom bearing from dust.
- A Counter Weight keeps the assembly stable and upright. The Counter Weight also aids with the insertion of the Winged Adaptor to the supply tube.
- 500 mm of Flexible PVC Tube allows the assembly to be suspended in a vertical position above plants and foliage.
- The Winged Adaptor may be inserted into the supply tube by a thread or barb.

APPLICATIONS

- Agricultural applications and greenhouses.

Micro Valves

Barb & Thread Connections

FEATURES and BENEFITS

- Inline Micro Valves, easy to install, simple to use. Rotate rotor for water control management of micro irrigation installations.
- Available in three connection combinations, Barb x Barb, Thread x Thread and Barb x Thread.
- Two coloured models are available for the Barb x Barb and the Thread x Thread micro valves:
 1. **Black Base with a Black Rotor**
 2. **Yellow Base with a Blue Rotor**.
- The Barb x Thread micro valve is only available with a **Black Base** and a **Black Rotor**.

APPLICATIONS

- Micro irrigation installations where flow control is required.

Barb & Thread Connections

FEATURES and BENEFITS

- The Testa Roja Quick Action Valves are easy to install, simple to use. To control the water flow of irrigation installations rotate the valve handle. A quarter turn of the handle is all that is required to go from full flow to the "OFF" position.
- Available in three connection combinations, Barb x Barb, Barb x Male Thread and Barb x Female Thread.
- Many different combinations are available.
- The Female Threaded Nut on the Female Threaded Valves rotates independently from the body. (**Patented**)
- The 13 mm valves are for 16 mm O.D. LDPE Tube.
- The 17 mm valves are for 20 mm O.D. LDPE Tube.
- The 14 mm, 15 mm and 18 mm valves are for dripline and are also available in colour **Brown**.

APPLICATIONS

- Irrigation installations where flow control is required.

PLEASE NOTE:

- Valve Sizes specified refer to the Inside Diameter of Tube.
- A filter should be installed at the beginning of the system to protect the emitters and valves. The system should be drained if temperatures are expected to reach freezing point.
- Recommended Maximum Operating Pressure: 3 bar
- Recommended Operating Temperatures: 1° C to 50° C

Testa Roja Valves

TECO MICRO IRRIGATION CATALOGUE

PE & PVC Pipe, Lay-Flat & Tape Connections

FEATURES and BENEFITS

- The Testa Roja Quick Action Valves are easy to install, simple to use. To control the water flow of irrigation installations rotate the valve handle. A quarter turn of the handle is all that is required to go from full flow to the "OFF" position.
- Available in various connection combinations, Take-Off for PE Pipe Connection, D-Barb, Male Thread, Female Thread (Rotating Nut), Ø16 and Ø22 Tape Connection, Take-Off for PVC Pipe Connection and a new easy to install Flex Connect™ Lay-Flat Adaptor.

APPLICATIONS

- Irrigation installations where flow control is required.

PLEASE NOTE:

- Valve Sizes specified refer to the Inside Diameter of Tube.
- To protect the integrity of the valves, the system should be drained if temperatures are expected to reach freezing point
- Recommended Maximum Operating Pressure 3 bar - 1/2" and 3/4" Body**
- Recommended Maximum Operating Pressure 9 bar - 1" Body**
- Recommended Operating Temperatures: 1° C to 50° C**

Filters & Pressure Reducers

Threaded Connections

FEATURES and BENEFITS

- Easy to install Y-Filter / Pressure Reducers and In-Line Pressure Reducers 3/4" threaded connections and preset Outlet pressures
- Eight colour coded Y-Filters with Pressure Reducers and preset outlet pressures are available: Four Y-Filter / Pressure Reducers with 3/4" Male Pipe Thread connections (Inlet & Outlet) Four Y-Filter / Pressure Reducers with 3/4" Female Thread (Inlet) and 3/4" Male Pipe Thread (Outlet).
- Four In-Line Pressure Reducers with 3/4" Female Thread (Inlet) and 3/4" Male Pipe Thread (Outlet).
- The Pressure Reducer controls mains water pressure at the outlet to: 1.0 bar (Red)
1.4 bar (Blue) 1.8 bar (Black) 2.5 bar (Green)
- Y-Filter with 3/4" Male Pipe Thread (Inlet & Outlet).
- The 150 Mesh Stainless Steel Filter Screen in the Y-Filters traps particles in the water to reduce clogging of emitters.
- The 3/4" Female Threaded Nut on the Y-Filters and the In-Line Pressure Reducers rotates independently from the body.

APPLICATIONS

- Landscaped gardens, greenhouses and vegetable gardens

TECO MICRO IRRIGATION CATALOGUE

Barb and Thread Connections

FEATURES and BENEFITS

- Easy to install Y-Filters with 3/4" threaded connections and In-Line Filters with thread and barb connections.
- Y-Filter without Pressure Reducer with 3/4" Female Threaded (Inlet) and 3/4" Male Thread (Outlet).
- Nine In-Line Filters are available: Four In-Line Filters with 13 mm, 14 mm, 16 mm and 20 mm Barb connection (Inlet & Outlet). Four In-Line Filters with 3/4" Female Thread (Inlet) and 13 mm, 14 mm, 16 mm and 20 mm Barb (Outlet). One In-Line Filter with 3/4" Female Thread (Inlet) and 3/4" Male Thread (Outlet).
- The 150 Mesh Stainless Steel Filter Screen in the Y-Filter and the In-Line Filter traps particles in the water to reduce clogging of emitters.
- The 3/4" Female Threaded Nut on the Y-Filter and the In-Line Filters rotates independently from the body.

APPLICATIONS

- Landscaped gardens, greenhouses and vegetable gardens

Ultra™ Stakes

Registered Design

FEATURES and BENEFITS

- The Ultra™ Stakes are ideal for landscaped gardens where plant heights differ and a variety of stake lengths are required to raise watering emitters above the plant foliage.
- Rigid Risers or Flexible Vinyl tube may be inserted into the stakes providing many height options.
- The stakes may be spot placed away from the main supply line to irrigate plants and shrubs.
- Two Ultra™ Stake lengths available, 200 mm and 310 mm. (**Registered Design**)
- Suitable for use with 6.9 mm O.D. Rigid Risers or Flexible Vinyl Offtake Tube.
- Five Ultra™ Stake Assemblies: - 200 mm Stake with 200 mm Rigid Riser Tube and 4.5 mm Barbed Adaptor - 310 mm Stake with 300 mm Rigid Riser Tube and 4.5 mm Barbed Adaptor - 310 mm Stake with 500 mm Flexible Vinyl Offtake Tube and 4.5 mm Barbed Adaptor - 200 mm Stake & 310 mm Stake with Micro Adaptor for direct connection of 10-32 UNF Male Threaded Bases or "FAST Thread" Bases , 500 mm Flexible Vinyl Offtake Tube and 4.5 mm Barbed Adaptor.
- Slim Line**
- The Ground Hook is suitable for main supply lines from 16 mm O.D. to 20 mm O.D.
- The Ground Hook firmly secures main supply lines in position on the ground once the design layout has been defined in the garden bed.

APPLICATIONS

- Landscaped gardens, pots and vases.

Micro Fittings, Adaptors, Nut and Tails

FEATURES and BENEFITS

- A range of micro fittings and adaptors with barb or "FAST" thread connection.
- Nut and Tails (with Rotating Nut) for easy connection to tubing, main water supply lines and emitters.
- A 1/2" female threaded adaptor with self-tapping micro connection for "FAST" Thread and 10-32 UNF threaded emitters. This adaptor is ideal for connection to 1/2" threaded risers.

APPLICATIONS

- Landscaped gardens, green houses and vegetable gardens.

Rigid Risers

FEATURES and BENEFITS

- Risers used to raise emitters above plant foliage.
- Rigid Risers available in four lengths, 150 mm, 200 mm, 300 mm and 450 mm with Barbed connection, "FAST" thread connection and 1/2" Male Thread adaptor
- The HDPE (high density polyethylene) Rigid Risers are suitable for 10-32 UNF and "FAST" thread emitting devices such as Ottima™, Maxima™, Idra™, Single Piece Jets, Down Sprays and Orbita Micro Sprinklers
- The Barbed and "FAST" Threaded Rigid Risers may be used with Ultra™ Stakes
- Riser Tube Dimensions - 4 mm ID x 7.6 mm O.D.

APPLICATIONS

- Landscaped gardens, greenhouses and vegetable gardens.

Ratchet Clamps, Repair Plugs, Micro Saddle and Accessories

FEATURES and BENEFITS

- The Micro Saddle provides secure, leak free attachment to LDPE tube.
- (Patented) No tools required. Self Piercing for rapid installation.
- The 4.5 mm Barbed Take-Off adaptor provides connection for micro tube.
- Ratchet Clamps for securing LDPE tube to barbed fittings.
- Repair Plugs for repairing holes in Low Density Polyethylene tubing.
- Universal Key Punch aids in the installation and removal of micro fittings and sprays.
- A 1/2" Male threaded adaptor with self-tapping micro connection for "FAST" Thread and 10-32 UNF threaded emitters.

APPLICATIONS

- Landscaped gardens, greenhouses and vegetable gardens.

Double Barb Dripline Fittings

FEATURES and BENEFITS

- A complete range of Double Barbed Acetal fittings for Dripline.
- Sharp edged barbs maximise retention and provide a secure, leak free attachment to Dripline. They may be used without ratchet clamps.

APPLICATIONS

- Low pressure micro irrigation systems such as landscaped gardens, greenhouses and vegetable gardens.
- Recommended operating pressure 0 to 3.0 bar (300 kPa)

Accessories

Accessories for Lay-Flat Hose, Valves, Adaptors & Sprinkler Assemblies

FEATURES and BENEFITS

- The Lay-Flat Hexagon installation tool with a wrench attachment in the head of the handle for screwing and tightening of the Lay-Flat Lock Nut.
- The Lock Nut secures the eye connection to the Lay-Flat Hose and creates a leak free connection.
- The eye connection fitting has a Sealing Cap available to minimize soil intrusion when storing.

Hose & Dripline Connections

FEATURES and BENEFITS

- Low Profile, Easy to Grip Lock Nut- Provides a secure connection every time. The compact design does not interfere with the retrieval of the hose after installation.
- Tight Seal - The coarse thread ensures a tight, leak proof seal even in dirty conditions.
- The Barbed insert in conjunction with the Compression Collar in the nut provides Superior Retention Strength.
- Quick and Easy Installation.

550 SERIES

- Designed to be used with: Dripline sizes - 16, 17 and 18 mm Outside Diameter Hose sizes - 14, 15 and 16 mm Inside Diameter
- Available in Coupling, Tees, Elbows as well as Shut-Off valves.

Drip Kits

TECO MICRO IRRIGATION CATALOGUE

Patio Kit & Vegetable Kit

FEATURES and BENEFITS

- Teco drip watering kits have been designed to give the user the maximum flexibility when installing the system. The system can be easily installed by following the simple instructions displayed on the kit.
- Expandable. Drippers may be added or removed from the system as your watering needs change.
- The watering system saves up to 70% of water and minimizes weed growth.
- The kits contain proven quality engineered products used each day in drip watering systems.
- Easy assembly in 6 steps.
- Adjustable drippers from 0 - 6 l/h
- Drippers may be turned off.
- Drippers may be easily opened for cleaning.
- The system may be used with automatic timers.

APPLICATIONS

- Patios, green houses and vegetable gardens.

PATIO KIT CONTENTS

- 1 x Pressure Reducer, 1.5 bar, 3/4" Female Nut x 3/4" Male Thread
- 12 x Delta Drip Spike, Adjustable 0 - 6 l/h, End-Line, 4.5 mm Barb
- 10 x Goof Plug
- 14 x Tee, 4.5 mm Barb
- 1 x 3/4" Female Nut x 4.5 mm Tail
- 2 x Elbow, 4.5 mm Barb
- 20 m x Micro Tubing (4 mm I.D. x 7 mm O.D.)

VEGETABLE KIT CONTENTS

- 1 x Pressure Reducer, 1.5 bar, 3/4" Female Nut x 3/4" Male Thread
- 20 x Delta Drip Spike, Adjustable 0 - 6 l/h, In-Line, 4.5 mm Barb
- 10 x Goof Plug
- 6 x Tee, 4.5 mm Barb
- 1 x 3/4" Female Nut x 4.5 mm Tail
- 2 x Elbow, 4.5 mm Barb
- 20 m x Micro Tubing (4 mm I.D. x 7 mm O.D.)

Solar & Battery Operated Controllers

400A Series Battery Operated Controllers

400A Series Battery Operated Controllers (Waterproof)

Designed for residential and commercial applications or where AC power is unavailable, the rugged 400A series Single Station Battery Operated Controllers are available with a two wire DC latching solenoid and three adapters to fit most valves, or completely assembled on a 3/4" to 1" globe valve. Outfitted with the latest and most efficient electronic management technology, the 400A series controllers can operate for up to three years on two AA alkaline batteries.

Completely waterproof and able to operate in harsh environments, the 400A series controllers offer a simple and dependable solution for any irrigation system above or below ground.

LEIT 1™ In-Line Valve

LEIT 1™ In-Line Valve (Solar Powered)

DIG's LEIT 1™ ILV-075 to ILV-200 single-station ambient light (solar) powered controller with a two wire DC latching solenoid is available on a 3/4" to 1" globe valve mounting.

Powered by a photovoltaic module with a patented microelectronic energy management system, the LEIT 1™ requires no batteries, AC power, or direct sunlight to operate, and can be installed above grade in any location where there is ambient light.

710AP-000 Series Propagation Controller

710AP-000 Series Battery Operated Propagation Controllers

The 710AP-000 series single station controller is a versatile battery operated controller equipped with a two wire DC latching solenoid and designed with propagation, misting and irrigation cycles to provide advanced programming capabilities for all types of commercial, greenhouse and nursery applications. Fully waterproof and powered by two AA alkaline batteries that can last for up to three years, the 710AP-000 features logical, revolving menus for simplified programming and review.

The controller features a propagation mode including cyclical frequencies from 1 minute to 59 minutes or from 1 to 12 hours, and durations in seconds for loop watering with selectable start and stop times.

The controller comes with a solenoid and includes adapters for DIG, Rain Bird, Hunter and Toro valves

Controllers

EVO 100I

EVO 100 (Waterproof solar powered digital hose end timer tap timer)

The EVO 100 is a Solar powered Hose End Tap Timer with a 3/4" female thread inlet and male thread outlet. Power is derived via a patented, time-tested, internal photovoltaic module and microelectronic energy management system that is fueled by the surrounding ambient light (solar). After being charged, this efficient energy system provides enough power for the timer to function at any time, night or day, and in any weather with no direct sunlight required. This energy system also makes the EVO 100 environmentally friendly, functioning only on clean, renewable solar power without the need for a backup battery or AC power.

The EVO 100 features a large, easy-to-read LCD screen and simple, icon-based programming with weekly or cyclical programs, four start times per day, durations of up to six hours, program delay of up to 99 days, system off, manual operation, and a sensor wire connection to accept a rain sensor.

B09D Digital Hose End Timer

B09D Digital Hose End Timer

DIG's B09D 3/4" Digital Hose End Timer, one in our newest range of hose end timers, offers simplified programming and improved monitoring of battery power with less current, resulting in longer battery life with reliable operation. With higher flow rates at lower inlet pressures and a range of programming features, the B09B delivers a reliable and cost effective solution for residential use.

The B09D Digital Hose End Timer has four start times per day with durations from 1 minute to 12 hours 59 minutes in an operating flow range of 2 to 24 liters per minute, allowing use in a wide range of applications including drip irrigation or micro sprinkler systems connected to a garden hose or faucet / spigot. This new hose end timer uses one 9-volt alkaline battery that can last for over a year.

6 mm Dripline

Micro-line™

MICRO-LINE™

The compact size makes the Micro-line™ dripline ideal for a wide range of applications. For commercial and residential uses, the Micro-line™ dripline is installed above ground and can be covered with mulch. The Micro-line™ dripline drip emitter is built with a large filter along the cross section of the drip emitter to ensure that moving particles on the bottom of the drip line do not enter the labyrinth water path, ensuring trouble free operation and long life.

FEATURES and BENEFITS

- Used above ground or under mulch for a variety of applications such as containers and narrow plantings
- Large labyrinth water passage and turbulent flow help reduce clogging
- Inlet filter helps prevent particles from entering the drip emitter labyrinth path
- Resistant to chemicals and fertilizers commonly used in landscape applications
- Use with 1/4" (6 mm) barbed fittings
- Flexible tubing for easy installation
- Two outlets per drip emitter ensure less chance of clogging
- Available in two colours (**Brown** and **Black**)

SPECIFICATIONS

- Flow rates: 2 lph at 1 Bar
- Dripper color code: blue
- Operating pressure: 0.7-1.7 Bar
- Dripline color code: **Black** or **Brown**
- Materials: Dow FINGERPRINT™ DFDA-7510 NT linear low-density polyethylene resin
- Size: 6 mm (4.445 mm ID x 6.35 mm OD)
- Spacing: 15 cm and 30 cm
- Available in 30 m and 300 m Coils
- Minimum bending radius: 0.3 m
- Filter requirement: minimum of 150 mesh

LIVING WALL™ KIT

Modular Vertical Garden Kit

GLW08 Living Wall™ modular Vertical Garden kit with 8 Pots

DIG's Living Wall™ Modular Vertical Garden kit is designed with expandable wall mounting brackets from which up to four large and four small pots can be hung vertically. The kit also includes an integrated professional watering system to deliver controlled amounts of water into each individual pot, using pressure compensating drippers with check valves.

DIG's Living Wall™ Modular Vertical Garden Kit supports an open area between the pots and the wall, providing protection from moisture and preventing discoloration of the exposed wall.

FEATURES

Convenient modular wall mounting brackets that allow the pots to be hung and removed from the wall very easily.

The wall mounting modular brackets can be easily secured to each other with a simple self-lock position for quick and easy installation and kit expansion.

The durable modular wall mounting brackets can be connected in a wide range of patterns with vertical or horizontal panels or any pattern desired.

The kits pots can easily be mounted, removed and re-mounted again for very convenient system installation

Micro Irrigation Installation Guide

Some helpful hints and advise when installing an irrigation system

TIPS:

- Contract a professional irrigation designer to design and install your system. Ensure the system suits your plants and soil type
- Install micro irrigation emitters that suit your individual plants watering needs.
- Install a irrigation controller with a range of programming features that include seasonal adjustment and a rain sensor.
- Irrigate to encourage deep roots and mulch around your plants to conserve moisture in the soil. Do not over-irrigate.
- Monitor your water use and if need be contact an expert for advice.
- Drain your system at the end of the irrigation season, check and clean your system and components at the beginning of the season to ensure all is working and functioning correctly.
- Install an inline filter at the start of your irrigation system to protect the emitters, valves and other components.
- Install a pressure reducer (2 bar) on a mains water supply to protect your system from pipe blowouts.

TECO SRL

Conditions of Sale Limited Warranty

Teco Srl warrants to its trade customers that Teco Srl products will be free from original defects in workmanship and material for a period of one year from date of delivery.

Within the warranty period of one year and upon notice and delivery of defective products to Teco Srl, Teco Srl agrees to replace or repair only product determined by Teco Srl to be defective in material and workmanship. In no event shall Teco Srl be liable for payment of any expenses or charges other than the cost of performing its obligation to replace or repair at Teco Srl's sole discretion in accordance with this basic commercial warranty.

Unauthorized repairs, misuse, neglect, modification, accident, improper installation or subjection to line pressure in excess of 300 kPa shall void this warranty.

In the case of purchase of the product for use other than, for irrigation purposes, Teco Srl hereby disclaims any implied warranties including any warranties of merchantability and fitness for a particular purpose.

The warranty is exclusively limited to Teco Srl products only.

This warranty applies only to Teco Srl products and explicitly does not apply to any product used in conjunction with Teco Srl products.

Teco Srl shall in no event be liable for incidental or consequential damages of any nature. Teco Srl's sole obligation shall be limited to the replacement or repair of defective parts at Teco Srl's sole discretion pursuant to this warranty.

This warranty shall extend only to the original purchaser of the product.

Teco Srl makes no other warranties expressed or inferred.

No agent, representative, distributor, or anyone else has the authority to waive, modify, or add to the printed provisions of this warranty, to make any representation or warranty not contained herein, or to extend this warranty to anyone other than the original user.

In order to obtain performance under this warranty, the defective product must be returned to the factory along with proof of purchase, shipping prepaid, addressed as follows:

Your Notes

A blank sheet of white paper with horizontal grey ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

AND COMING SOON ... DRAINAGE.

 **NDS**[®]
We put water in its place

Irrigation Catalogue 2025

Our products are engineered and produced for superior performance, durability, ease of installation and the efficient use of resources.

Since its humble beginnings in 1972 with the invention of the first plastic catch basin for landscape drainage, NDS has grown into one of the world's most trusted brands for stormwater, irrigation, access box, and flow management solutions. Its commitment to industry leadership has been unwavering, resulting in remarkable innovations and state-of-the-art products that are engineered and manufactured for performance, durability, ease of installation, and the efficient use of resources.

In 2014, NDS became part of the multinational NORMA Group, focusing on its rapidly growing water management business. Today, we're proud to introduce NDS as NORMA Group's flagship water brand in EMEA and the world.

**NDS IS YOUR KNOWLEDGEABLE AND TRUSTED PARTNER
FOR THE BEST IN WATER MANAGEMENT SYSTEMS**
